CRITERION 2

TEACHING - LEARNING AND EVALUATION

2.6.2 Attainment of Programme outcomes and course outcomes are evaluated by the institution

Submitted to

NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL

Attainment of Outcomes

Attainment of Outcomes:

- The Program Outcomes (POs) and Program Specific Outcomes (PSOs) are accomplished through curriculum.
- Course Outcomes (COs) are defined for each course and they are mapped to POs and PSOs.
- A set of performance evaluation criteria is used for quantitative assessment of COs.
- Thus the attainment of COs provides an evidence of attainment of POs and PSOs.

Following are the different methods for Assessment, Evaluation and Measurement of POs/PSOs

- Direct Assessment methods
- Indirect Assessment methods

Direct Assessment Methods:

- **Continuous Assessment:** COs are assessed through Sessional & Assignment Examinations, Home Assignments and Lab records. The COs are mapped against each question and CO analysis is carried out by faculty for each course and documented in Faculty Course Assessment Report (FCAR). The contribution of COs is assessed in high, moderate and low levels, towards the attainment of POs/PSOs.
- **Semester-end Theory Examinations:** The questions in semester-end examinations are tested pertaining to all COs, in varying Blooms Taxonomy Levels.
- **Laboratory Records:** Both continuous and semester-end examinations are conducted to test the COs attainment.

Indirect Assessment Methods:

- **Programme Exit survey:** This survey, taken from the final year students at the completion of their graduate degree programme, stands as the comprehensive feedback for the PO/PSO assessment.
- **Alumni Survey:** This survey is conducted annually through Google link or mail with the Alumni to obtain the inputs and suggestions on PO attainment in the real time societal environment.
- **Employer Survey:** This survey is taken from the employer to measure the PO attainments.

Procedure for attainment of COs:

Course outcomes will be attained through direct and indirect methods. The following table shows the three target levels: Low, Moderate and High attainment for direct and indirect methods. Level Average Percentage Level

1. **L (Low) 41-50%**
2. **M (Moderate) 50.01-60%**
3. **H (High) 60.01% and above**

Target level for attainment of COs is set based on average marks of that course in the previous academic year. Attainment level of all course outcomes of a course is displayed in a table format. In addition, the institution takes the placement record and higher education details of the students as supporting evidences for the assessment of POs. Using CO-PO mapping, the mapped POs are considered for assessment by:

$$\text{PO Direct Assessment} = \frac{\sum \text{Level of mapping of PO with CO} * \text{Average of CO attainment}}{\sum \text{Level of mapping of PO with CO}}$$

For example: Assessment of PO1:

Table: Course Outcome Mapping with Program Outcome 1 (PO1)

PO1		Level of Mapping
CO1	96.5	3 (H)
CO2	91.5	3 (H)
CO3	84	3 (H)

$$\text{PO Direct Assessment} = \frac{\sum \text{Level of mapping of PO with CO} * \text{Average of CO attainment}}{\sum \text{Level of mapping of PO with CO}}$$

$$\text{PO Direct Assessment} = \frac{(3 \times 96.5) + (3 \times 91.5) + (3 \times 84)}{3 + 3 + 3} = 90.67$$

SHRI BHAVANI SHIKSHAN PRASARAK MANDAL'S
SHIKSHAN MAHARSHI GURUVARYA R. G. SHINDE MAHAVIDYALAYA,
PARANDA- DIST. OSMANABAD
NAAC REACCREDITED WITH 'A' GRADE WITH CGPA 3.15

Set the target level of attainment for PO1, say 70%, then it is concluded that PO1 is attained.
Accordingly, PSO attainments are calculated directly and indirectly.

$$\text{PSO Direct Assessment} = \frac{\sum \text{Level of mapping of PSO with CO} * \text{Average of CO attainment}}{\sum \text{Level of mapping of PSO with CO}}$$
